Professional Summary

Software Engineer with 1 year of experience building scalable web applications using the MERN stack. Proficient in React.js, Node.js, and MongoDB with strong expertise in frontend development, API integration, and system design. Experienced in developing enterprise dashboards, authentication systems, and multi-tenant SaaS applications. Skilled in writing clean, maintainable code and solving real-world problems. Seeking Software Engineer opportunities in a growth-oriented organization.

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI

Backend: Node.js, Express.js, REST API Development, MVC Architecture

Database: MongoDB, Mongoose

Authentication: JWT, Role-Based Access Control (RBAC), bcrypt

Tools: Git, GitHub, Postman, VS Code

Concepts: CRUD Operations, RESTful API Design, Authentication & Authorization, Pagination, Filtering, Searching, Performance Optimization

Professional Experience

Front-End Developer

WhyDigit Systems Pvt Ltd, Bengaluru

Feb 2025 – Present

- Developed enterprise-level HRMS and Finance modules using React.js and Redux Toolkit, improving UI efficiency and usability.
- Built dynamic and scalable forms with validation using React Hook Form and Zod.
- Integrated REST APIs and optimized data handling with proper error and loading state management.
- Designed reusable components and implemented lazy loading to improve application performance.
- Collaborated with backend and QA teams in Agile (Scrum) environment.

Intern – MERN Stack Developer

FeOS Technologies Pvt Ltd, Chennai

Sep 2024 – Jan 2025

- Developed full-stack modules using React.js, Node.js, Express.js, and MongoDB.
- Built RESTful APIs with CRUD operations following MVC architecture.
- Implemented authentication and role-based access control using JWT.
- Designed MongoDB schemas using Mongoose for efficient data modeling.
- Tested APIs using Postman and maintained version control using Git.

Projects

Expense Tracker AI – Multi-Tenant SaaS Platform

[Live Demo](#)

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, OpenAI API, ExcelJS

- Developed a full-stack AI-powered Expense Tracker SaaS application supporting multiple users with secure data isolation.
- Implemented authentication and authorization using JWT-based login and protected routes.
- Added Forgot Password and Reset Password functionality using Nodemailer email integration.
- Built AI-powered financial insights to analyze expenses and income with year-wise, month-wise, and day-wise reporting.
- Developed interactive dashboard analytics with categorized transaction summaries and charts.
- Implemented advanced filtering, search, pagination, and list view functionalities for transaction management.
- Added Excel export/download feature for expense and income reports.
- Designed responsive and modern UI using Tailwind CSS and React.js.
- Created RESTful APIs using Express.js following MVC architecture.
- Integrated MongoDB for secure and scalable data storage.
- Deployed frontend on Vercel and managed production-ready API integrations.
